Summary

A result-oriented professional with experience in Software Developer, Software Engineering, Software Development, Java, Hibernate, Postgres, MongoDB, Java Api, REST API, Python, Scala, MySQL, Ruby, HTML, CSS, C, C++, DBMS, Data Structures, Algorithms, OOPS, System Design, Project Management, and Requirement Gathering.

Work Experience

 OYO as Software Developer

Jul 2019 to Till Date

o Core team member of OYO's Ordering Team which is responsible for creating and managing various services for orders like bookings, meals, wizard and ancillary orders, etc.

o Worked on migrating Ordering's entire codebase and various API's from Ruby to Java as part of the Ordering Management System. This led to a decrease in P99, P95, and P50 of most of the APIs by more than 70%.

o Design and develop the end-to-end architecture of the meal plan management system for various platforms like an app, website, and other external platforms like Booking.com, Expedia, etc. The product aims at providing meals to costumers which resulted in an increase in revenue by 10%.

o Worked on migrating my team's infrastructure from AWS Elastic Beanstalk to Kubernetes. Since it is an open-source technology, it helped in cutting our team's infra cost by 30%.

o Released various revenue-based projects involving wizard membership program which offers premium

membership privileges to customers.

o Responsible for end-to-end design and development of Scheduler Service as my first project using spring boot and quartz, which schedules and configures cron and simple jobs using a UI. Alerting was also configured within the service.

o Worked on the Global Distribution Platform (GDP), which was a multi-team project used to create bookings on hotels not under the OYO banner.

o Solved various problems like database optimizations, incorporating new features in existing APIs, etc. leading to recognition.

 Walmart as Software Developer Intern

May 2018 to Jul 2018

Worked on Dynamic Store Initiated Markdown (DSIM) product which aims to reduce costs incurred by Walmart through wastage of items in US and UK markets by 20%. By using Spark and Scala, I optimized the data preparation script which reduced the data collection time by 40%.
